

## Xenon or Xe Pumping Lamps for Lasers

Xenon gas filled lamps are often used to pump the pulsed Nd:YAG lasers, Hangzhou Shalom EO offers the **Xe pumping lamps** upon customer's requirements, our lamps are very competitive in the market.

Specifications	
Initiating Voltage(V)	≧ 600
Operating Voltage (V)	250-750
Maxium Loading Energy	65T
Frequency (Hz)	≧ 130
Maxum Current(A)	≧ 2000
Suggested Sigle-pulse Energy store (J)	90~240
Cooling	Water cooling (25 &°C)
Life-time (Pulses)	10 <sup>6</sup>
